

## Clark Forklift Parts

Performing worldwide, there are currently 350,000 Clark forklifts and lift trucks in operation, with in excess of 250,000 of those in use in North America. Clark has five major lines of lift trucks across the world, making it one of the most expansive companies in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, dual fuel, petrol, LPG, hand-driven lift trucks, narrow-aisle stackers and electric riders are a few of their specialties.

Clark Totalift has 20 exclusive brands of forklifts, with parts covering more than 120,000 particular items for all of its automated equipment. Your regional Clark Supplier is your complete source for availability of all your components requirements offered by Clark Totalift.

Clark's exceptional Parts Distribution Centers are conveniently situated in Louisville, Kentucky, which serves both their clients and sellers in North America, and Changwon, South Korea, which handles their Asian sellers and customers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing producers. Driven to supply the highest level of value and service to our users, Clark remains on the cutting edge when it comes to enhancing efficiency and benefiting performance.

Clark Totalift has a really outstanding intercontinental support network. With over 550 locations worldwide, dealer representation in over 80 countries and 230 locations in North America, their high level of commitment to their clients predominates the material handling market.

By revolutionizing the operator restraint system safety feature, Clark proudly remains a leader of innovation in the industrial equipment and automated lift truck industry. This exceptional dedication to safety is at this time a customary feature on every lift truck.

Clark has a unyielding goal to have the No. 1 quality system in the industry which is demonstrated by their commitment to ISO standards. Clark, is the first manufacturer of forklifts and lift vehicles to be globally certified with quality standard ISO 9001 in all of its manufacturing facilities. Furthermore, the ISO 14001 Environmental Stewardship System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement enables Clark to be ready for any number of environmental restrictions, thus placing them in a dominant industry position.

Clark has preferred the particularly economical and beneficial system of "Lean Production" for its assembly facilities and application of resources. This structure was established to acknowledge the most successful method of manufacturing plant management and ensuring maximum efficiency. Clark has completed this transition of its Korean plant. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and production efficiencies.

By working collectively, Clark's product suppliers and engineers communicate towards enhancing product effectiveness while minimizing expenses. The contemporary value engineering program combines progressive product growth and delivers improved customer support and service within the industry.
